DETAILED ACTION

1. This application has been examined.
2. The amendment and remarks filed 4/12/06 have been entered.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 33 and 40-48 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. These claims are directed to a computer program which is not statutory subject matter.

5. Claims 1-3, 6-19, 22-32, and 50 are allowable over the prior art of record. The amendment, especially in view of applicant's remarks, shows how the current invention distinguishes over the prior art in: the manner of displaying information pertaining to prior the invoking of an application to display the information, in response to an instruction to invoke the application and before completing a process for obtaining status information or alert information of the peripheral device via a communication link in response to the instruction to invoke the application, and then updating a content of the displayed information according to the obtained information in response to completion of a process for obtaining the status information or the alert information of

the peripheral device. This in combination with the other features of the independent claims are not set forth in the prior art of record.

6. Applicant's amendment and remarks do have merit over the art of record. However, the claims 33 and 40-48 are still not allowable in view of the 101 rejection. Note though that because this rejection is given for the first time, the Office Action is nonfinal.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P. Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.
